

# DESIGN YOUR UI TO DISPLAY THE WATER TURBIDITY ,PH VALUES

- 
- The water temperature ,ph and turbidity values are successfully received from IBM IOT Watson platform to Node –red.
  - The values from Node-red are displayed in the sensor window.
  - The values are displayed in the UI window and the values are fluctuating as they receive random values.

## river water quality monitoring system

Turbidity

temperature

## river water quality monitoring system

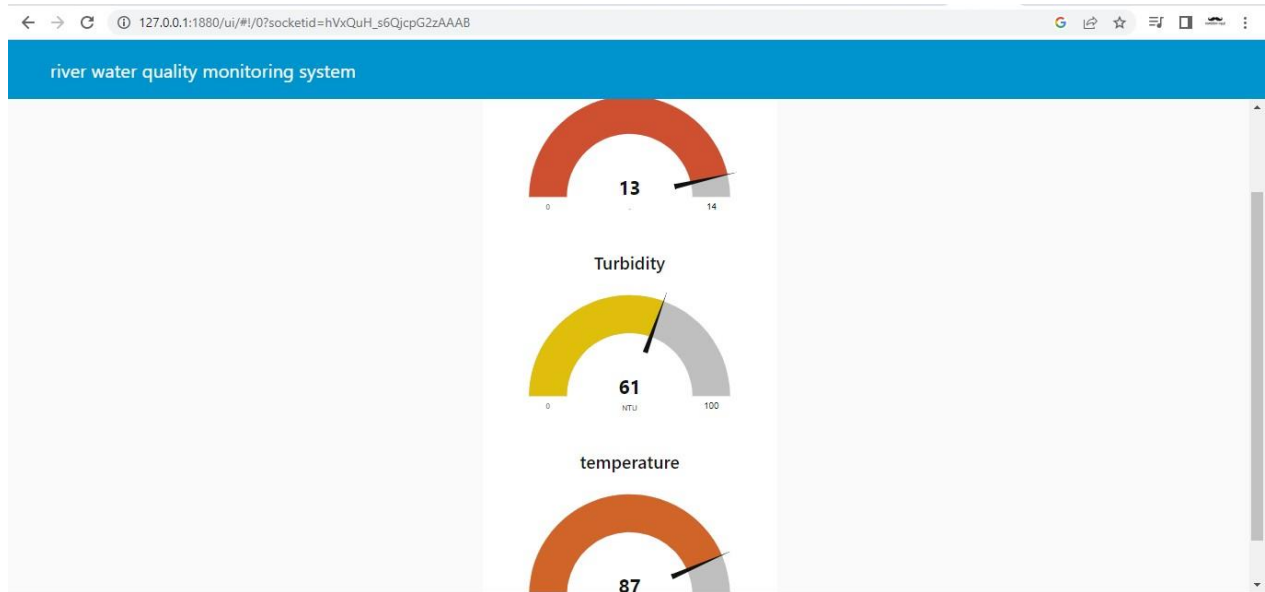

Turbidity

temperature

- Hence the UI has been designed to display Water temperature ,ph and turbidity.
